

BUDGETING

TIPS

Set A Budget

Before creating a budget, define what is negotiable and non-negotiable for your wedding.

Track Expenses

Track what you're spending as you go. An excel spreadsheet is helpful for this.

Negotiate

Negotiate with vendors to create a plan on how you can work together to make their services work for your wedding.

Review and Adjust

Review your budget periodically to ensure it's still applicable and aligned with your desired outcome.
